
Application No.: 10/719557Case No.: 58710US002

Amendments to the Specification:

Please amend the specification as follows:

On page 8, please replace the paragraph that starts on line 20 with the phrase "An axis 51" and ends on line 23 with the phrase "moving web 12." with the following amended paragraph:

An axis 151 of the second frame roller 50 is approximately parallel to an axis 41 of the first frame roller 38. A distance from the first frame roller 38 to the second frame roller 50 defines a guide span 53 as best illustrated in Figure 1. The guide span 53 is relatively long as compared to the width of the moving web 12.
